

Vintage Adjustable Brace Bracket

- 1) Endpoint is located at the optimal height for RF performance
- 2) Installation is repeatable every time, so it takes out the unnecessary contractor variable in measuring each installation height
- 3) Installation time is less than 30 seconds- no cutting rebar or plastic pipe to length, pounding pipe in, attaching bracket to rebar or pipe, or measuring proper height
- 4) Meter repair is made much easier as bracket with Endpoint can easily be removed to allow more space for the meter work to take place
- 5) Bracket insures that Endpoint is up off of the ground and away from shifting soil, so installations remain the same for years to come
- 6) Plastic bracket with stainless 316 tabs insures long life and corrosion resistance
